

Using Second Generation Tachograph Vehicle Units

When using second generation tachographs, manual entries are different and can cause confusion if not completed correctly. If you wish to complete a manual entry for time spent working away from the vehicle complete the following:

In this example:

Finished in lorry at 09:42 on 19.05.15
Then worked from 09:42 until 10:05
Rest until start at 09:31 on 20.05.15
Insert card at 09:41 on 20.05.15

Select yes for manual entry

It will then ask you what you have been doing since last ejection of the card

Use the up arrow to select what work was completed when the card was ejected

Once the work style has been chosen, press 'OK' to go along the date and time of activity

Press 'OK' when finished and it will ask you what you did from when you finished that activity until inserting the card. Ensure you manually enter the rest you had that day, in this example from 10:05 yesterday until 09:31 today

Finally, add in the additional work completed that day before the entry of the card. When this has been completed press 'OK'
